WIDE RANGE OF MATERIALS

NEOS digital printers are versatile and perfectly suited to print onto many different types of surfaces such as aluminum, steel, wood, paper, cardboard, plastic.

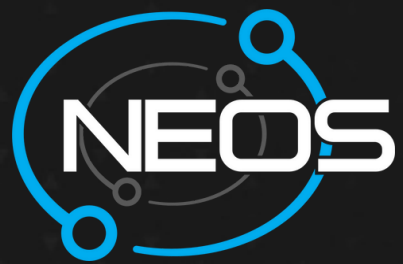

DIFFERENT SIZES AND THICKNESSES

NEOS digital printers can print on all the substrates sizes, from the smallest to the largest ones, and various thicknesses, from a thin piece of paper to a thick wooden panel.

HIGH PRINT RESOLUTION

The in-house developed CMS software ensures a very high color control on NEOS digital printers. This means color accuracy and consistency across different substrates.
